'DosaLite' volumetric (piston) fillers

High quality, easy-to-use pneumatic dosing fillers for all types of container and options for thick or thin products, including drinks, oils, sauces, creams, paints, chemical products, lotions, gels.

Product feed via hose or hopper, and may be fitted with heating, mixing and pushing systems.

Constructed in polished 316 stainless steel, easy to clean-in-place and dismantle / reassemble. A variety of valves, nozzles and accessories are available to suit each application

Speed 300 – 1200 containers per hour
