EXPERTS IN LIQUIDS PROCESSING FILTRATION AND BOTTLING

Product ref. CA – 11

Date: 12/12/17

Induction Sealer – hand-held

Uses heat generated by non-contact magnetic induction to apply suitable foil seals to bottles and jars made of, glass and other non-metallic materials, such as plastics: PE, PET, PP, PVC, ABS.

Siemens IGBT power management, high efficiency, low power consumption.
Touch-control panel to set power and time, with automatic counting function.
Automatic heating, over-current protection, auto power off after 15 minutes of inactivity.

Supply Voltage	220V/50Hz
Output Power	600-1000W
Size Of Seal	10-100mm
Capacity	10- 40 bottles/min
Sealing Heat	0.1-5.0 sec
Seal Thickness	0.05-0.40mm
Machine Size	320*350*60mm
Machine Weight	2.5kg

Price:

Induction Sealer

£265
