Product ref. CA-05

Date: 30/09/12

Automatic capper / corker / crowner

Automatic machine with many options for applying different style bottle closures.

Models are available for cork, crown or different screw-cap finishes. Available as a 'twin' unit to easily change to a second closure type.

The unit is easily adaptable for most shapes and sizes of bottle with minimal change parts. Simple and robust design for minimum fuss and maximum reliability.

Operate as a standalone unit or linked by conveyer to other machines (e.g. filler, labeller)

Speed up to 2,500 bottles per hour.

Example prices:

Crowner, screw capper or corker complete with conveyer + drive	£13,650
TWIN unit (2 closure types)	£23,450
Extra for Stelvin or long screwcaps	£1,300
Conveyer extensions, per 450mm	£330
Rectangular collecting table	£300
800mm rotary collecting table	£2,450
Extra for thin bottles (<65mm diameter)	£350

Prices exclude shipping, commissioning and VAT

Technical data	LSTV 2000
Capacity approx. bottles/hour	2500
Bottle height max.	450
Bottle diameter	up to 120 mm
Air requirement for sealing unit	approx. 200 litres/min. eff. approx. 4 bar air pressure
Dimensions (L x W x H)	500x900x2200
Weight in kg	150
Electrical supply	230 V
